Mailbox Enclosure

NextStone is excited to announce the launch of our newest product, the 22" and 12" Mailbox Enclosure kit with Solar Lighting. This unit is a full 1 piece surround complete with solar lighting at the address cutout as well as the perimeter of the Sandstone cap. Included in the kit is a copper colored mailbox and matching flag, fasteners and touch up kit. Currently we have in stock the Drystack pattern in a 22" available in all colors and the Random Rock pattern 22" available in New England Mocha, Tri - Buff, and Tri - Gray. The LedgeStone pattern is available in the 12" size in Kentucky Gray, Western Taupe, and Carolina Cocoa. Additional Random Rock and

LedgeStone colors are available as a special order and will have an extended lead time. This kit can be used on a new mailbox installation or to enhance an existing one. Brackets located within the enclosure attach to a 4x4 post, the solar lights located in the address cutout and the cap get connected, secure the cap and installation is complete. Having solar lights as part of the enclosure really makes this a unique product allowing you to have a lighted area without running electricity. Easy installation makes for a great Do-It-Yourself project that gives you the look of real stone without the hassle and weight. Full installation instructions are available on our website NextStone.com
