

If you have basic carpentry skills, you can install NextStone™ with ease. **No mason! No mortar! No mess!**

If you are a builder, contractor, or installer, you can now maximize your profits on every job that comes your way. NextStone™ composite rock siding allows you to finish all of the square footage on your jobs with basic carpentry skills.

## Control Your Projects

Tired of waiting on masonry subcontractors to finish your stone work project? Use your siding crew to give a professional rock finish to your project—on time, and under budget.

## Time is Money

NextStone™ products go up quickly and easily. A Random Rock panel—which covers 4.75 ft<sup>2</sup>—can be installed in less than a minute, with a 10 x 10 ft wall installed in less than an hour. Compared to other stone products, you can immediately see the time and cost savings when using NextStone™.

## Keep Working

Reduce the risk of injury and keep you and your staff on the job. Compared to the heaviness of other stone products, NextStone™ is lightweight and quick to install. With the largest panel weighing only five pounds, you can work quickly without risk of serious injury during installation.

## Products

NextStone™ manufactures a wide variety of stone styles and colors, plus matching accessories. Contact us today to find a dealer in your area.

# Increase Your Profits!

With basic carpentry skills, you can finish projects faster, easier and with more profits than with cast, cultured®, or natural stone products.

## Patented Insulated Faux Stone Siding

Lightweight, easy-install polyurethane stone panels and accessories

**No mortar!  
No mason!  
No mess!**

## Endless Applications

### Walls

Don't leave the bottom of the wall to the stone mason. Use NextStone™ to transition and compliment siding material on the wall for a professional finish.

### Decks and Fences

Use NextStone™ as deck skirting, and tie it all together above the deck with the NextStone™ Post Covers.

### Outdoor Living Spaces

With more time spent at home, home owners are investing in their outdoor living spaces. Use NextStone™ to build out the BBQ grill, the outdoor fireplace or the open bar for a quality valued added finish.

### Columns

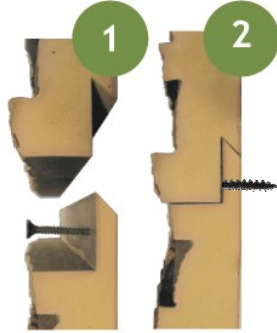

Columns are an expensive and difficult masonry task. NextStone™ offers a variety Column Wraps that install just as easy as the panels. Use them to cover posts on porches, deck supports, entry ways, and more.

NextStone™ makes all of your applications easy with a full line of panels and accessories that work great with all types of exterior cladding materials.

No mess installation

Patented interlocking system hides fasteners

Easy Installation

Energy Savings

Fire Retardant

UV Inhibitors

Driving Rain + Salt Spray

### Easy to Install

NextStone™ is designed to go up just like vinyl siding. If you have basic carpentry skills and hand tools, you can install NextStone™. Our patented tongue and groove attachment allows you to screw the product directly to the wall, with the next course covering the screws so there is no need to caulk or paint.

### Lightweight AND Durable

At 1 pound/square foot, NextStone™ products are lightweight, yet extremely durable. The surface is hard and completely resistant to the elements. With a proprietary In Mold Coating, backed by a 20-year warranty, you can install NextStone™ with confidence. There is no weight loading of the wall or roof with NextStone™. Applications do not require special engineering or added handling costs compared to cultured®, cast or natural stone.

### How to Get Started

If you have ever put up siding, you already know how to install NextStone™. Each box includes easy to follow instructions, and complete installation manuals, training

## Time Comparison for a 100 Sq. Ft. Stone Installation

Average Installation Time in <i>Minutes</i>	NextStone™	Masonry
Attach Starter Strip	10	0
Attach metal lathe	0	30
Prepare mortar mix	0	12
Apply scratch coat	0	12
Let scratch coat cure	0	12
Apply rock face	50	180
Cure, brush and tuck	0	20
Average Total Installation in minutes	60	266
Area Covered	100	100

### Set Yourself Apart

Stand out from your competitors by offering something different. With NextStone™, you offer your clients:

### Professionalism

A look that really sets your project above the others. The stone finish gives a professional and custom look that regular siding can't provide.

### Environmental Awareness

NextStone™ is a Certified Green product by the US and Canada Green Building Council. Not everyone insists on green building products, but everyone feels good about using materials that are easier on our environment. It shows you care, and that you are on the cutting edge of construction and design.

### Insulation Value

NextStone™ products, made with rigid polyurethane, provide an approximate R-value of 4.5 per inch thickness. Your clients will gain an insulation bonus with NextStone™ on their home.
